- **Copilot, help me diagnose** a decision-making block

Environmental Class

- **Copilot, help me diagnose** an environmental pressure
- **Copilot, help me diagnose** a market-driven constraint
- **Copilot, help me diagnose** a situational disruption

Worksheet Use Instruction

The Work Sheet is the Key to Success

After ensuring Copilot has the Trial Image Key, pose your question,

"Copilot, help me diagnose" - for any issue or situation.

Copilot will create a worksheet tailored to the subject.

Paste your work sheet into Word, or readable editor

Answer the questions as thoroughly as possible, add your own notes if you wish, they will be factored in.

Once your worksheet is completed in word,

Simply copy and paste the worksheet into Copilot, and the ONE engine will return a report with corrections to implement.

After the ACTIONS have been taken to correct the issue.

Fill in the results section of the worksheet and upload again to Copilot for refinement. Repeat this process to solve any machine, system, organizational, personal, or environmental (surroundings) problems.

(Yes, it's what we have been looking for all along.)
